

ANASTASIA BIGUN

UX Designer

SUMMARY

UX Designer with a background in frontend development and product design, experienced creating wireframes, mockups, and interactive prototypes in Figma for web and desktop experiences. Skilled in usability research, responsive frontend development, and translating complex workflows into intuitive user experiences. Uses AI-assisted workflows to rapidly prototype, iterate, and explore product ideas in collaborative environments.

EXPERIENCE

UX Engineer / Website Manager, Freelance, Salt Lake City, UT

11/2019 – Present

- Partnered directly with business owners across e-commerce, healthcare, creative, and professional service industries to translate business goals into intuitive digital experiences.
- Redesigned information architecture, page hierarchy, and responsive layouts to improve usability and reduce cognitive load across desktop and mobile experiences.
- Built and launched responsive websites using HTML, CSS, JavaScript, and Tailwind CSS, including the redesign and deployment of Camelot Veterinary Clinic's public website.
- Used AI-assisted workflows to accelerate wireframing, frontend prototyping, content structuring, and interface iteration across responsive web experiences.

Onboarding Project Manager, Weave, Lehi, UT

02/2023 – 04/2026

- Translated complex customer workflows into intuitive onboarding and user experience solutions that improved usability and operational clarity.
- Conducted stakeholder discovery sessions, workflow mapping, and process analysis to identify usability gaps, operational friction, and opportunities to improve customer experience.
- Partnered cross-functionally with Product, IT, and Support teams to surface user insights, improve workflows, and resolve technical blockers impacting over 29,000 customers and supporting the acquisition of over 1,500 customer accounts.
- Led a cross-functional team of seven in a company-wide AI Challenge, designing a prototype and proposal for an AI-powered workflow solution to improve internal Support operations.

Youth Coding Camp Instructor, Simply Coding, Orem, UT

06/2018 – 07/2019

- Delivered engaging, outcome-driven instruction to 300+ students, enabling them to design and build functional digital experiences using HTML/CSS, JavaScript, Java, and Python.
- Developed and continuously optimized the student onboarding process, ensuring a seamless learning journey aligned with program goals and learner success metrics.
- Partnered with Utah Valley University staff to evaluate hardware and software integration, ensuring system reliability and smooth classroom technology performance.

EDUCATION

B.S. in Web Design and Development

Brigham Young University - Idaho, 2019

UX Design Professional Certificate

Google, 2025
